

Project Overview

Name: MyBit

Slogan: The leaders in distributing wealth

Logo (28x28 static URL): <https://files.mybit.io/mybit-icon-28x28.png>

Summary: MyBit enables the rapid building, testing, and deployment of decentralised wealth management applications on the Ethereum Blockchain.

Company Name: MyBit Foundation

Country: Switzerland

Structure: Non-Profit

Size of Team: 20-25

Legal: Mayerlustenberger Lachenal

Registration Number: CHE-177.186.963

Headquarters: Crypto Valley Labs, Dammstrasse 16, 6300 Zug, Switzerland

Token Distribution Phase 1

Started: July 17, 2017

Ended: August 17, 2017

ETH Contributed: 10,044

Equivalent in USD (at time): 3.027.060

Token Distribution Phase 2

Starts: January 1, 2019

Ends: 365 days later

100.000 MYB per day totalling 36.500.000 will be distributed

Price is based on daily ETH contributed.

Token Details

Name: MyBit

Symbol: MYB

Type: ERC20

Token Contract Address: [0x5d60d8d7ef6d37e16ebabc324de3be57f135e0bc](https://etherscan.io/address/0x5d60d8d7ef6d37e16ebabc324de3be57f135e0bc)

Maximum Supply: 180.000.000 (180 Million)

Circulating Supply: 101.036.795 (+36.500.000 after Phase 2 of token distribution ends)

Decimal Places: 18

About

MyBit was started by a team of industry veterans who spotted a massive problem with today's financial systems. Third party agents such as lawyers, escrow agents, and brokers are required to establish trust and conduct transactions. This is inefficient, unsafe, and expensive. Our vision is to utilise smart contract technology to eliminate the need for these centralised sources and create a more efficient, secure, and cost-effective wealth management environment.

MyBit provides robust developer tools such as SDKs and UI Kits to give engineers the power to rapidly build, test and deploy wealth management applications on the Ethereum blockchain as well as funding mechanisms to support and scale disruptive projects.

Products

Software Development Kits - Our SDKs simplify the process of designing and building wealth management dApps.

MyBit Go - A decentralised investment platform focused around the internet of things.

MYDAX - A decentralised asset exchange.

Decentralised Development Fund - The DDF facilitates the migration towards a globally inclusive and automated company by easily allowing contributions from a worldwide talent pool.
